

Aluminum Tab Collection/Recycling Project

Who benefits from the program?

The money received from the recycling of the tabs is used to buy medical and non-medical items for Shriners Hospitals for Children.

What are some of the items purchased with the money?

Baxter Infusion Pump
used to dispense pain medication

Arthrometer used to measure the degree of instability in the knee

Bullard Laryngoscope used by an anesthesiologist to place a breathing tube in a patient who has a complex airway

Who collects the tabs?

Tabs are saved by individuals and groups and are brought to the hospital in jars, bags, boxes, crates, and barrels. They come from everywhere—all over New England, New York and even some from as far away as California!

10 Foot Trailer for the Hospital Van
used to transport medical equipment and records to outreach clinics held throughout New England and New York State

Computerized Pressure Mapping
a force sensing array used in evaluating pressure distribution for patients requiring customized wheelchair seating systems
